January 29, 2016

Dr. Terry Zobeck
Associate Director, Office of Research and Data Analysis
Office of National Drug Control Policy
750 17th St., N.W.
Washington, DC 20503

Dear Dr. Zobeck:

This report presents the results of our independent review of the U.S. Department of Transportation, Federal Aviation Administration’s (FAA) fiscal year 2015 Drug Control Obligation Summary and Performance Summary reports to the Office of National Drug Control Policy (ONDCP). We received FAA’s reports on December 7, 2015. The reports and our review are required by 21 U.S.C. § 1704 (d) and ONDCP’s Circular, Accounting of Drug Control Funding and Performance Summary (Circular) of January 2013.

The Circular states that when drug-related obligations total less than $50 million and a detailed accounting would constitute an unreasonable burden, agencies are permitted to submit alternative reports. Because its drug-related obligations for fiscal year 2015 totaled less than $50 million, FAA submitted alternative reports. We reviewed FAA’s reports and related management assertions to determine the reliability of those assertions in compliance with the Circular, in all material respects. We conducted our review in accordance with generally accepted Government auditing standards for attestation engagements. A review is substantially more limited in scope than an examination, which would express an opinion on the accuracy of FAA’s Drug Control Obligation Summary and Performance Summary reports. Because we conducted an attestation review, we do not express such an opinion.
Drug Control Obligations Summary

We performed review procedures on FAA’s fiscal year 2015 Drug Control Obligation Summary (enclosure 1) according to the Circular’s criteria. We limited our work to inquiries and analytical procedures appropriate for an attestation review. Specifically, we tested selected accounting internal controls to ensure drug control funds were properly identified in the accounting system.

We reviewed $18,832,000 of obligations from 2 of FAA’s drug control decision units (Aviation Safety/Aerospace Medicine and Security and Hazardous Material Safety) and traced those obligations to the Department of Transportation’s accounting system. We found the total obligations for the Aviation Safety/Aerospace Medicine decision unit were understated by approximately $270,000.

FAA agreed the correct figure for Drug Control obligation reporting for fiscal year 2015 for the unit should have totaled $16,308,000, not $16,038,000, and attributed the approximate $270,000 understatement to a transposition error during the development of its report.

Performance Reporting Summary and Assertions

FAA’s performance targets for fiscal year 2015 were to: (1) initiate regulatory investigations on 95 percent of all airmen involved in the sale or distribution of illegal drugs within 30 days of knowledge, notification by law enforcement, or a conviction; (2) ensure the aviation industry conducts random drug and alcohol testing of safety sensitive employees with results not exceeding 1 percent positives for drugs and 0.5 percent positives for alcohol; and (3) conduct 1,205 drug and alcohol inspections of the aviation industry to ensure compliance with Federal regulations. FAA indicated that it met all three performance targets.

We performed review procedures on FAA’s fiscal year 2015 Performance Summary Report and management’s assertions (enclosure 2). We limited our review processes to inquiries and analytical procedures appropriate for an attestation review according to the criteria in the Circular. Specifically, we reviewed FAA’s internal controls for performance measures to gain an understanding of how the measures were developed.

Other than the exception to the Obligation Summary report, no information came to our attention that the accompanying FAA fiscal year 2015 Drug Control Obligation Summary and Performance Summary reports were not presented in conformity with ONDCP’s Circular.
Sincerely,

[Signature]

for

Louis C. King
Assistant Inspector General for Financial and Information Technology Audits

Dr. Terry Zobeck
Associate Director for Research and Data Analysis
Office of the National Drug Control Policy
750 17th St., NW
Washington, DC 20503

Dear Dr. Zobeck:

In accordance with the Office of National Drug Control Policy Circular: Drug Control Accounting issued January 18, 2013, the Federal Aviation Administration’s (FAA) Fiscal Year 2015 Drug Control Obligation Summary is enclosed. FAA’s obligations for drug-related activities fall below the reporting threshold of $50 million; therefore, only a limited report is required to satisfy the statutory requirement.

FAA’s point of contact for this report is Sean Richey. He can be reached at (202) 267-7822, if further assistance is required.

Sincerely,

Mark House
Chief Financial Officer

December 3, 2015

Dr. Terry Zobeck
Associate Director for Research and Data Analysis
Office of the National Drug Control Policy
750 17th St., NW
Washington, DC 20503

Dear Dr. Zobeck:

In accordance with the Office of National Drug Control Policy Circular: Drug Control Accounting issued January 18, 2013, the Federal Aviation Administration's (FAA) Fiscal Year 2015 Performance Summary Report is enclosed. FAA’s obligations for drug-related activities fall below the reporting threshold of $50 million; therefore, only a limited report is required to satisfy the statutory requirement. As specified by the Circular, the Agency selected two performance measures for Aviation Safety (AVS) for FY 2015 and one performance measure for Security and Hazardous Materials (ASH) for FY 2015 to assess its success in reducing the prevalence of drug and alcohol-impaired personnel who perform sensitive duties within the aviation industry and in initiating regulatory action against airmen involved in the sale or distribution of illegal drugs. Additional metrics are included in the body of the enclosures for FYs 2009 through 2014. These performance measures reflect a critical milestone in the goal to promote the safety and security of the National Air Space (NAS) and the flying public. These performance measures are:

1. Initiate regulatory investigations on 95% of all airmen involved in the sale or distribution of illegal drugs within 30 days of knowledge or a conviction or notification by law enforcement (ASH).
2. Ensure the aviation industry conducts random drug and alcohol testing of safety-sensitive employees with results not exceeding one percent (1%) positives for drugs and one-half percent (0.5%) positives for alcohol (AVS).
3. Conduct 1,205 FAA drug and alcohol inspections of the aviation industry to ensure compliance with 14 CFR part 120 and 40 CFR part 49 (AVS).

Assertions

1. Performance reporting system is appropriate and applied: Performance information for the first measure relies on official Agency data residing in the Investigations Tracking System (ITS) and Enforcement Information System (EIS)\(^1\). Data resident in ITS/EIS includes: the date of the offense, when first known to FAA, start date of the action, source of the information, and final sanction.

---

\(^1\) ITS and EIS are FAA’s system for tracking investigations and information about enforcement actions for statutory or regulatory violations.
For measures two and three, the information relies on surveys conducted by the Agency of all part 121 operators and all other employers with 50 or more safety-sensitive employees. The latter provide to FAA annual report of their testing results. The remaining employers with 49 or fewer safety-sensitive employees are randomly chosen to submit an annual report.

No performance measure was reported for the Air Traffic Organization because its work structure does not lend itself to the development and tracking of such metrics and is not cost-effective to the government to do so. Additional information can be found in enclosures.

2. **Explanations for not meeting performance targets are reasonable**: Targets met.

3. **Methodology to establish performance targets is reasonable and applied**: Data collection for the first measure is based on official FAA databases. For the last two measures, the Department of Transportation (DOT) requires the Agency to determine these measures using the Drug and Alcohol Management Information System (DAMIS) reporting. Due to the reporting methodology, this sampling of DAMIS reporting is always one calendar year behind. Additional information can be found in the enclosed Summary Reports.

4. **Adequate performance measures exist for all significant drug control activities**: The measures used to describe the Agency's performance adequately reflect key steps toward the prevention and detection of drug related activities in the NAS. These measures provide a meaningful assessment of progress toward the development of safe and reliable airspace.

FAA’s points of contact for this report are as follows:

ASH: Elena Loboda, (202) 267-4914

AVS: Carol Kelly, (202) 267-3769

ATO: Robert Ridgeway, (202) 267-0546

Sincerely,

Mark House,
Chief Financial Officer

Enclosures
Federal Aviation Administration
Industry Drug and Alcohol Testing Program
Performance Summary Report
Fiscal Year 2015

(1) Performance Measures

The Federal Aviation Administration (FAA) contributes to the National Drug Control Strategy by reducing the prevalence of drug and alcohol-impaired personnel from performing safety-sensitive duties in the aviation industry.

The Department of Transportation (DOT) requires the Agency to determine these measures using the Drug and Alcohol Management Information System (DAMIS) reporting. Each year, the FAA conducts a survey of every aviation employer that employees 50 or more safety-sensitive employees, and a random selection of employers that employ 49 or fewer safety-sensitive employees. These employers are notified to report their data showing the number of drug and alcohol tests conducted, and the number of positive test results, along with other miscellaneous information. Due to the reporting methodology, this sampling of DAMIS reporting is always one calendar year behind. For example, employers were required to report all testing they accomplished for calendar year 2014 by March 15, 2015. In an effort to ensure the most accurate data, the DOT allowed for late submissions until October 1, 2015, at which time no more entries were allowed. The most current reported data available is for calendar year 2014.

(2) Prior Years’ Performance Targets and Results

The prior year targets for 2008, 2009, 2010, 2011, 2012 and 2013 were fully achieved. Annual targets are determined by the DOT and require the positive test results for drugs to be less than 1.0% and the percentage of positive alcohol tests to be less than 0.5%. The results for the prior years are as follows:

<table>
<thead>
<tr>
<th>Calendar Year</th>
<th>Total Drug Tests Reported</th>
<th>Percentage of Positive Drug Tests</th>
<th>Total Alcohol Tests Reported</th>
<th>Percentage of Positive Alcohol Tests</th>
</tr>
</thead>
<tbody>
<tr>
<td>2008</td>
<td>199,510</td>
<td>0.588%</td>
<td>53,939</td>
<td>0.123%</td>
</tr>
<tr>
<td>2009</td>
<td>164,356</td>
<td>0.534%</td>
<td>51,480</td>
<td>0.088%</td>
</tr>
<tr>
<td>2010</td>
<td>179,894</td>
<td>0.503%</td>
<td>50,580</td>
<td>0.11%</td>
</tr>
<tr>
<td>2011</td>
<td>191,011</td>
<td>0.462%</td>
<td>50,324</td>
<td>0.097%</td>
</tr>
<tr>
<td>2012</td>
<td>181,804</td>
<td>0.456%</td>
<td>50,124</td>
<td>0.132%</td>
</tr>
<tr>
<td>2013</td>
<td>193,048</td>
<td>0.485%</td>
<td>52,662</td>
<td>0.091%</td>
</tr>
</tbody>
</table>
(3) Current Performance Targets

Because the methodology requires test reporting to be one calendar year behind, the current year is considered calendar year 2014. For this calendar year, the total drug tests reported were 197,450, resulting in 0.535% positive drug tests. The total alcohol tests reported were 52,171, resulting in 0.106% positive alcohol tests.

(4) Quality of Performance Data

As mentioned previously, the FAA does not require all regulated employers to report their MIS data. During our compliance inspections of covered employers, our inspectors verify the data submitted to DAMIS to ensure its integrity. In FY 2015, the Drug Abatement Division conducted 1,454 inspections.

The following chart indicates the number of employers that reported their data:

<table>
<thead>
<tr>
<th>Calendar Year</th>

Federal Aviation Administration
Law Enforcement Assistance Program
Performance Summary Report
Fiscal Year 2015

(1) Performance Measure

The Federal Aviation Administration’s (FAA) Law Enforcement Assistance (LEA) Program contributes to the National Drug Control Strategy by reducing access to the National Airspace System (NAS) by airmen known to the FAA to be involved in the sale or distribution of illegal drugs. The LEA Program Special Agents provide extensive technical and administrative assistance, on a timely and continuous basis, to all Federal, State, local, tribal, territorial, and international law enforcement (LE) agencies engaged in drug interdiction efforts. These LEA Program Special Agents have access to FAA data, not available to other agencies, that is critical to the development of investigations on airmen involved in illegal drug trafficking. The information FAA provides to LE assists them in the arrest and conviction of airmen and/or the seizure of aircraft.

By working jointly with LE, FAA learns of investigations and information that enables FAA to initiate regulatory enforcement investigations on airman/aircraft suspected of drug trafficking; in many cases, these investigations result in the revocation of airmen certificates thus contributing to the safety and security of the national airspace system (NAS) and the flying public.

The FAA uses a single performance measure to assess the program. This performance measure reflects a critical milestone in the goal to promote the safety and security of the NAS and the flying public by restricting access to the NAS by airmen who have violated statutory and regulatory requirements for maintaining an airman certificate.

- PERFORMANCE MEASURE: Initiate regulatory investigations on 95% of all airmen involved in the sale or distribution of illegal drugs within 30 days of knowledge of a conviction or notification by law enforcement.

(2) Prior Year (2014) Performance Target and Results

In FY14, FAA LEA Program Special Agents initiated 58 investigations based on 58 notifications (100%) regarding airmen involved in the sale or distribution of illegal drugs within 30 days of knowledge of a conviction or notification by law enforcement. FAA later took regulatory actions against 31\(^2\) of the airmen (56%) arrested for drug related offenses, thus impacting their ability to legally access the NAS. Those regulatory actions are depicted in the chart to the left. Significant action (revocation/suspension) was taken 45% of the time.

---

\(^2\) This includes regulatory action that was finalized from prior year investigations.
(3) Current Year (2015) Performance Target and Results

In FY15, FAA LEA Program Special Agents initiated 48 investigations based on 48 notifications (100%) regarding airmen involved in the sale or distribution of illegal drugs within 30 days of knowledge of a conviction or notification by law enforcement. FAA later took regulatory actions against 483 of the airmen (100%) arrested for drug related offenses, thus impacting their ability to legally access the NAS. Those regulatory actions are depicted in the chart to the left. Significant action (revocation/suspension) was taken 53% of the time.

(4) Summary of 2014 and 2015 Results

<table>
<thead>
<tr>
<th>FY 2014 Target</th>
<th>FY 2014 Achieved</th>
<th>FY 2015 Target</th>
<th>FY 2015 Achieved</th>
</tr>
</thead>
<tbody>
<tr>
<td>95%</td>
<td>100%</td>
<td>95%</td>
<td>100%</td>
</tr>
</tbody>
</table>

(5) Quality of Performance Data

Performance information for the measure relies on official agency data residing in the Investigations Tracking System (ITS) and Enforcement Information System (EIS). Data resident in ITS/EIS includes: the date of the offense, when first known to FAA, start date of the action, source of the information, and final sanction.

---

3 This includes regulatory action that was finalized from prior year investigations.
4 ITS and EIS are FAA’s system for tracking investigations and information about enforcement actions for statutory or regulatory violations.
ATO drug control related activities

1. The Air Traffic Organization (ATO), as the FAA's operations component, is the country's primary air navigation services provider and responsible for the operational control of nation's airspace. In addition to supporting the safety and efficiency of aviation for air commerce, ATO collaborates with interagency partners to support national defense, homeland security, and law enforcement missions. This interagency cooperation includes air traffic management (ATM) support to the North American Aerospace Defense Command (NORAD), Customs and Border Protection (CBP), and other partners carrying out drug control missions in the National Airspace System (NAS).

2. ATM related support to drug control missions includes: a) standard air traffic control (ATC) services for government aircraft on missions; b) special handling of those same aircraft, specifically including flights performing surveillance; c) facilitation, including ATC tracking of suspect flights, of intercept, surveillance, and other missions; and d) identification and facilitating the response to suspicious aircraft.

3. The above support for drug control efforts are integral to the daily duties carried out by the agency's air traffic controllers, as well as ATO's air traffic security coordinators. This operational support is not broken out as separate drug control programs. In many cases, this support is provided as routine support to NORAD, or CBP and other LEA partners. The ATO personnel involved may not be aware that they are specifically assisting a drug control effort versus supporting any other type of defense, homeland security, or law enforcement mission.
